LIQUID NAILS[®]

ADHESIVE

Whether remodeling or adding a bathroom, a shower surround is a cost-effective, attractive alternative to a full-size tub. A myriad of shower surround kits are available in a variety of styles, color choices and shelf configurations.

Construction adhesive in the installation process:

- Apply LIQUID NAILS[®] Tub Surround and Shower Wall Adhesive in a continuous bead on the back of the panels.
- Place the panels into position and press firmly against the wall.
- For a quicker bond, use the venting method. Pull the panel away from the wall, wait 3 to 5 minutes and then press back into place.

How to Apply...

Molding, Thresholds, Mantels

Apply 1/4" "S" shaped bead over the length of material.

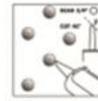

Paneling, Foamboard

Apply 1/4" bead around perimeter, 1" in from edge. Apply "S" shaped beads in center of panel.

Mirrors

Apply bead 3/4" thick by 2" x 2" wide for each square foot of mirror. Mirrors require mechanical fasteners as well as adhesive.

Tub & Shower Surrounds

Apply rounded bead 1" in from edge. Beads should be 1/8" thickness, 4" or apart.

Don't Forget Your Tools

- Caulk gun
- Utility knife
- Mineral spirits
- Soap & water
- Rags
- Rubber gloves
- Safety goggles
